WORK EXPERIENCE

Analytics Engineer Intern | Lendio, Lehi, UT

Jun 2025 – Dec 2025

- Shipped client-facing data products modeled end-to-end in dbt on Snowflake across 75+ external financial institutions via tiered purchase-gated analytics packages, driving measurable loan policy changes
- Engineered ETL pipelines on Snowflake to ingest, transform, and load data across staging, intermediate, and mart layers
- Optimized key KPIs by refactoring data models and SQL into pre-aggregated views, reducing load times by 35%
- Modeled slowly changing dimensions via dbt snapshots to preserve point-in-time accuracy for lender policy history
- Enhanced ThoughtSpot dashboard interactivity, raising report usage by 25% across internal teams and external clients

Data Assistant | Northeastern University, Boston, MA

Mar 2024 – May 2025

- Automated weekly vendor API ingestion into S3 with AWS Lambda, Step Functions, and EventBridge scheduling
- Deployed an AWS Glue ETL job transforming raw JSON into optimized Parquet for 55,000+ graduating students across 40+ commencement ceremonies, queried through Amazon Athena
- Integrated Tableau with Amazon Athena on a scheduled weekly refresh to deliver up-to-date reporting and trend analysis
- Built customized dashboards tracking KPIs for event logistics, attendance, and student engagement across ceremonies
- Applied NLP techniques (NLTK) to extract entities and classify hundreds of open-ended survey responses

Data Engineer | Tata Consultancy Services, Mumbai, IN

Aug 2022 – Dec 2023

- Created Talend ETL pipelines to ingest and migrate data from 25+ partner banks into Hadoop/Hive, supporting Reserve Bank of India's centralized data infrastructure across regulated financial institutions
- Streamlined business metadata generation and orchestrated downstream Spark/SparkSQL ETL conversions via Python, SQL, and UNIX/Linux shell workflows, improving process efficiency by 45%
- Optimized dimension update pipelines spanning MySQL and Hive environments, reducing processing time by 55%
- Engineered PySpark routines to transform and validate compliance reporting data between XBRL and SDMX standards
- Programmed a Python pipeline to load cell-mapping files from HDFS into MySQL reference layer for regulatory reporting

PROJECTS

NeighbourWise AI – Greater Boston Neighborhood Livability Intelligence Platform

- Coded an end-to-end pipeline with Dockerized Apache Airflow, AWS S3, Snowflake, and dbt to score across 9 domains
- Architected a multi-agent AI workflow using LangGraph, FastAPI and Streamlit, deploying 6+ specialized agents
- Implemented a RAG pipeline using Snowflake Cortex (e5-base-v2 model) with hybrid vector and keyword scoring
- Delivered production guardrails surfaced through a Streamlit UI backed by a REST API with 15+ verified endpoints

CardioPredict – AI-Powered Clinical Decision Support System for Cardiac Risk Detection

- Evaluated Logistic Regression, Random Forest and XGBoost across 1,303 patients, selected XGBoost at 96.5% recall
- Detected and remediated target leakage while engineering 32 features and a SHAP-driven Streamlit dashboard

Comprehensive Analysis and Data Architectures for Urban Motor Vehicle Collision Trends

- Built ETL/ELT pipelines on Azure Data Factory and Databricks, profiling and quality-checking 3M+ records with PySpark
- Designed interactive Power BI and Tableau dashboards for visualizing collision-trend findings and insights

TECHNICAL SKILLS

Languages: Python, SQL, SparkSQL, Scala, Shell Scripting, HiveQL, Java, R Programming

Databases: Snowflake, MySQL, Hive, MSSQL, SQLite3, HDFS, HBase, Oracle, PostgreSQL

Tools: dbt, Airflow, Docker, Azure Data Factory, Databricks, AWS (S3, Lambda, Glue, Athena), Tableau, Power BI, Talend

Libraries/Frameworks: PySpark, pandas, NumPy, scikit-learn, FastAPI, Flask, Streamlit, LangGraph, SQLAlchemy, seaborn

EDUCATION

Master of Science in Information Systems, Northeastern University (GPA 3.92)

Jan 2024 – May 2026

Honors: Laurel and Scroll 100 – Northeastern University Society of Distinction

Bachelor of Engineering in Information Technology, University of Mumbai (GPA 3.8)

Aug 2019 – May 2022
