WORK EXPERIENCE

Analytics Engineer Intern | Lendio, Lehi, UT

Jun 2025 – Dec 2025

- Shipped client-facing data products modeled end-to-end in **dbt** on **Snowflake** for external financial institutions, including a **Decisioning Outcomes Report** that drove measurable loan policy changes by lenders
- Engineered **ETL/ELT** pipelines with staging, intermediate, and mart layers, leveraging reusable macros and sources
- Optimized key KPIs by refactoring **data models** and **SQL** into pre-aggregated views, significantly reducing load times
- Modeled **slowly changing dimensions** via **dbt** snapshots to preserve point-in-time accuracy for lender policy history
- Developed **ThoughtSpot** dashboards and reports, delivering self-serve analytics to internal teams and external clients

Data Assistant | Northeastern University, Boston, MA

Mar 2024 – May 2025

- Developed **Python** ETL pipelines to aggregate and structure data for **35,000+** graduating students, supporting planning and execution of **40+** commencement ceremonies
- Orchestrated weekly data integration into **Tableau** with a scheduling script for real-time reporting and trend analysis
- Built customized dashboards tracking KPIs for event logistics, attendance and student engagement across ceremonies
- Applied **NLP** techniques (**NLTK**) to extract entities and classify hundreds of open-ended survey responses

Data Engineer | Tata Consultancy Services, Mumbai, IN

Aug 2022 – Dec 2023

- Created **Talend** ETL pipelines to ingest and migrate data from **25+** partner banks into **Hive**, supporting Reserve Bank of India's centralized data infrastructure across regulated financial institutions
- Built automated **Python**, **SQL** and **shell scripting** workflows for business metadata generation and **Spark** ETL jobs, improving overall process efficiency by **45%**
- Optimized dimension update pipelines spanning **MySQL** and **Hive** environments, reducing processing time by **55%**
- Developed **PySpark** scripts with robust null value detection and handling, improving data integrity by **80%**
- Led HDFS-to-local-server integration efforts, enabling downstream teams to access critical datasets across platforms

PROJECTS

NeighbourWise AI – Greater Boston Neighborhood Livability Intelligence Platform

- Architected a multi-agent AI pipeline using **LangGraph**, **FastAPI** and **Streamlit**, deploying **6+** specialized agents
- Built an end-to-end data pipeline with **Apache Airflow**, **AWS S3**, **Snowflake**, and **dbt** to score across **9** domains
- Implemented a **RAG** pipeline using **Snowflake Cortex (e5-base-v2 model)** with hybrid vector and keyword scoring
- Delivered production guardrails surfaced through a **Streamlit** UI backed by a **REST API** with **15+** verified endpoints

CardioPredict – AI-Powered Clinical Decision Support System for Cardiac Risk Detection

- Evaluated **Logistic Regression**, **Random Forest** and **XGBoost** across **1,303** patients, selected XGBoost at **96.5%** recall
- Detected and remediated target leakage while engineering **32 features** and a **SHAP-driven Streamlit** dashboard
- Embedded two **Claude (opus-4-7)** agents covering context-aware decision support and tool-use natural-language SQL

Comprehensive Analysis and Data Architectures for Urban Motor Vehicle Collision Trends

- Performed data profiling and field-level quality analysis on over **3 million** records using **PySpark** on **Databricks**
- Developed ETL pipelines in **Talend** and **Azure Data Factory**, loading data into **Snowflake** for downstream analytics
- Employed **Tableau** and **Power BI** to create visualizations illustrating key findings and patterns in collision trends

TECHNICAL SKILLS

Languages: Python, SQL, Scala, Shell Scripting, HiveQL, Java, R Programming

Databases: Snowflake, MySQL, Hive, MSSQL, SQLite3, HDFS, HBase, Oracle, PostgreSQL

Tools: dbt, Apache Airflow, Azure Data Factory, Databricks, AWS (S3, EC2), Tableau, Power BI, ThoughtSpot, Talend, Git

Libraries/Frameworks: PySpark, pandas, NumPy, scikit-learn, FastAPI, Flask, Streamlit, LangGraph, SQLAlchemy, seaborn

EDUCATION

Master of Science in Information Systems, Northeastern University (GPA 3.92)

May 2026

Honors: Laurel and Scroll 100 – Northeastern University Society of Distinction

Bachelor of Engineering in Information Technology, University of Mumbai (GPA 3.8)

May 2022
